The word of His Excellency the Minister

The Saudi Vision 2030 represents a roadmap for economic activity and improvement of the quality of life. The vision identifies a "prosperous economy" as a central axis and a goal to aspire to. To achieve this goal, the Kingdom has focused on enhancing quality, promoting sustainable development, and improving the business environment in various sectors. The Kingdom has launched a labor market strategy consisting of 11 reformative steps and 28 initiatives aimed at enhancing the efficiency and attractiveness of the market. Our local economy is envisioned to have one of the most diversified workforces globally and to be internationally competitive. It serves as a fundamental pillar in attracting foreign direct investment. This governmental strategy will empower both the private and public sectors to evolve, grow, and prosper. In the Ministry of Human Resources and Social Development, we work on attracting highly qualified international professionals to the market. Additionally, we are committed to providing more job opportunities for our sons and daughters, enhancing their capabilities, and equipping them with skills that align with the needs of the job market.
